PROJECTS

Influenza Preparation, Staffing Agency

Utilized data cleansing and integration techniques on multiple data sets. Examined trends using statistical analyses and visualizations in Tableau. Developed a dashboard to illustrate areas most affected by influenza infections and in need of additional medical staffing.

Customer Purchase Analysis, Instacart

Deployment of data preparation and exploratory data analyses. Merged dataframes and developed new variables based on client needs. Generated visualizations to illustrate relationships between variables. Final report describes ideal time periods for advertising, popular products, and customer demographics.

Rental Analysis, Movie Rental Company

Organized and joined client data in SQL using queries and common table expressions to answer complex business questions. Built visualizations using SQL data in Tableau. Presentation findings included areas with the largest customer base and top-earning films.

SKILLS
